

Environmental & Quality Policy

Engineered cutting tools

With headquarter in Sweden, LSAB operates cutting-edge manufacturing across the sites in Sweden, Finland and Germany. These centers of excellence are the heart of our business – where our production teams work hand in hand with R&D engineers and leading machine manufactures to shape the future of products. Our mission is clear: deliver superior performance, lower production costs, and enable sustainable, environmentally conscious manufacturing – all without compromise.

Our market offer is broad and consist of circular saw blades, bandsaw blades, planers, moulders, PCD tools and knives. We are an end-to-end partner who offers new tools and service throughout the tool's lifetime. Service is provided in our own network of service stations across Northern Europe.

This environmental and quality policy outlines the overall guidelines we have established for our quality and environmental work.

Our quality work

Our customers should be satisfied with us by providing goods on time, in the right place, and with promised quality. We should be responsive to customer requests and strive to offer technical solutions tailored to each customer's specific needs.

Our environmental work - for sustainable development

We shall protect the environment by reducing impact through:

- *Yearly decreasing our energy consumption and our CO2 emissions.*
- *Decrease our environmental impact by a responsible chemical and waste handling.*

In all parts of the company's activities, we shall strive to reduce the impact on the environment as much as possible, without compromising on quality or economic issues.

We shall work with continuous improvements, reduce our internal and external environmental impact, prevent pollution and ensure that laws and regulations are properly followed.
